

# They're so practical because we've had so much practice building them.

Over ten years of in-depth design experience goes into every Traditional Series Gator UV. And this extensive experience can give you peace of mind, no matter what the turf.

These vehicles' low center of gravity and wide stance guarantee stability, even when they're running with a heavy load. Even better: Their standard traction assist system and remarkably low ground pressure make them practical for traveling everywhere from fine turf to tough terrain.

No matter what direction you head, the Traditional Series can get you there with confidence.

**WHAT MAKES A GATOR A GATOR.**

### EASY TO USE

Intuitive controls and precision steering offer car-like drivability.

### STABILITY

Rack-and-pinion steering and ground-hugging center of gravity offer operator confidence no matter where you work.

### RELIABILITY

They're the ultimate work vehicles you can count on to go anywhere and do anything.

## Pick a direction. Go.
